MIXRACK SERIES

Design: Tapio Anttila,
interior architect SIO

MIXRACK SERIES

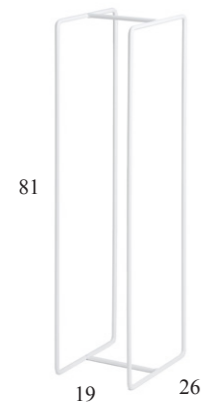

MIXRACK is a multi-functional collection of light and minimalistic storage items. It serves as temporary storage of clothes in bedrooms, dressing and hotel rooms, but also for storing of bottles, magazines and shoes etc. The basis for the design was to create as light and slender objects as possible, to suit various kinds of spaces. When empty, the products do not stick out from the surroundings.

Mixrack is the Winner of Ecodesign Award 2011.

All products are made of steel and are available in white and black.
